

TBL # 1: A geophysical journey around Ireland: Hodgson, Donohue, O'Connell, Krahn, Reid, and Young

DUE: September 12, 2016

Overview

The goal of this case study is to summarize a case history using the 7 step process.

Instructions

Individual exercise:

- Read the article
- Select one of the case histories to analyze
- Summarize the chosen case history within the 7 step framework
- When you want to refer to a figure, simply write in the figure number and provide your verbal comments
- Limit your response to one or two sentences for each of the 7 steps

Team exercise:

- Have a member of your team select the case history that you will analyze
- Discuss the case history amongst yourselves
- As in the individual exercise, summarize the chosen case history in the 7 step framework
- You will hand this in at the end of the class
